INSTRUCTIONS

All measurements must be made with a flexible 1/4 inch steel tape or cable to the nearest one-eighths (1/8) of an inch. To simplify addition, please enter fractional figures in eighths.

Official measurements cannot be taken for at least **SIXTY (60)** days after the animal was killed.

Please submit photographs. Photos of the right, left and front views of the horns are **REQUIRED.** A photo at kill site if possible.

A. Tip to Tip Spread is measured between tips of horns.

B. Length of Right Horn is measured from lowest point in front over outer curve to a point in line with the tip.

B. Length of Left Horn is measured from lowest point in front over outer curve to a point in line with the tip.

Revision 02/02
